WARNING – USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

- This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.
- The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.
- To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

OFFER OF SALE

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the detailed "Offer of Sale" elsewhere in this document or available at www.parker.com/hydraulicvalve.

Parker PCL Build Program

The PCL Build Program is designed to help a stocking distributor increase the value and services offered to their customers. This is accomplished by having the in-house capability of being responsive to your customer's needs. A wide variety of kits facilitate the conversion and customization of these controllers with a minimum amount of inventory.

Joysticks and stackable controllers have custom spring packs that are matched to our control valves and optimize controllability and machine performance.

The type of curve selected for the controllers in the program is referred to as "straight-line metering". This means that the "start pressure" and "final pressure" of the controller is linear. Here is a sample of this type of curve.

Here is a list of documentation available to support this product:

- ☐ PCL4 Catalog HY17-8357/UK
- ☐ Catalog CD HY14-1800/US – includes the bulletin, the catalog, spare parts list, service and assembly documentation, PowerPoint sales presentation, and DXF engineering drawings.

The basic kits for the program are:

- Joysticks and stackables with no handle.
- Handle kits.
- Detent kits.
- Footpedal conversion kits.
- Stud kits.
- Spring pack kits.
- Service kits.

Reference information:

Joysticks

- All ports are SAE 6.
- All ports (P,T,1,2,3,4) are located on the bottom of the housing.
- Mounting plate is code M1.
- Boots are included in the handle kits.

Stackables

- All ports are SAE 6.
- Pump and tank ports are located on the side of the housing. Ports A&B are located on the bottom of the housing.
- Mounting plate is code M3.
- Boots are included in the handle kits.
